

CONTROL AND COMMUNICATIONS

This mission critical industry requires an optimized electrical environment in order to allow companies to maximize the profitability out of their located and remote equipment. Maintaining its functionality is critical to receive your return on investment.

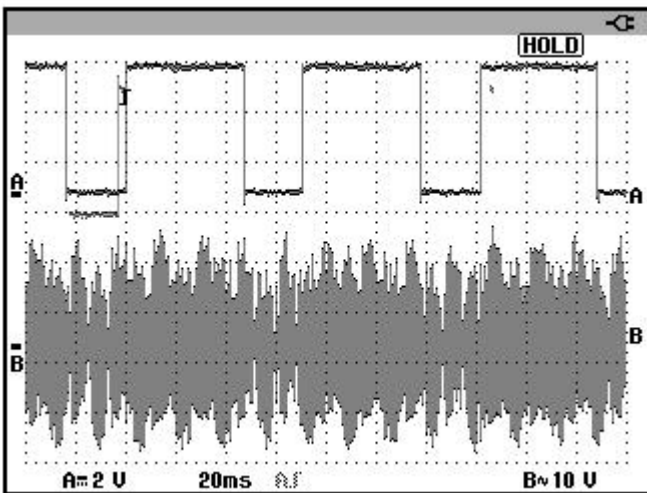

ENVIRONMENTAL POTENTIALS HAS THE SOLUTION!

EP's patented wave tracking technology absorbs and dissipates frequency noise and removes it from electrical distribution system without discharging energy to ground. This eliminates the need for individual Filters and TVSS. EP technology will isolate and protect your PAC/PLC equipment from harmful electrical environments.

BEFORE EP

Noise Induced from line side AC

AFTER EP

A pure data signal
